

# JavaScript 1-Month Intermediate Roadmap

## Week 1

Basics: variables, data types, operators, if/else, loops, functions, arrays, objects, strings. Practice: 20-30 CodeWars (8-7 kyu). Learn: JavaScript.info + Namaste JS.

## Week 2

Intermediate: scope, hoisting, execution context, closures, this, arrow functions, template literals, destructuring, spread/rest, map/filter/reduce, forEach. Practice: 25-30 CodeWars.

## Week 3

Async JS: callbacks, promises, async/await, fetch API, JSON, error handling, event loop, call stack, local/session storage. DOM: selectors, events, forms, event delegation. Build Todo & Weather apps.

## Week 4

Node.js basics: npm, modules, fs, path, http, environment variables. Express: routing, middleware, REST APIs, CRUD. Build Notes API. Revise all JS topics and solve 30 mixed problems.

Daily (5-6 hrs): 2 hrs learning, 2 hrs coding, 1-2 hrs project/revision.

Resources: JavaScript.info, Namaste JavaScript, MDN (reference), CodeWars, JavaScript30, Frontend Mentor, LeetCode (JS).
